

Med Stomach Tube

Gastric calibration tube

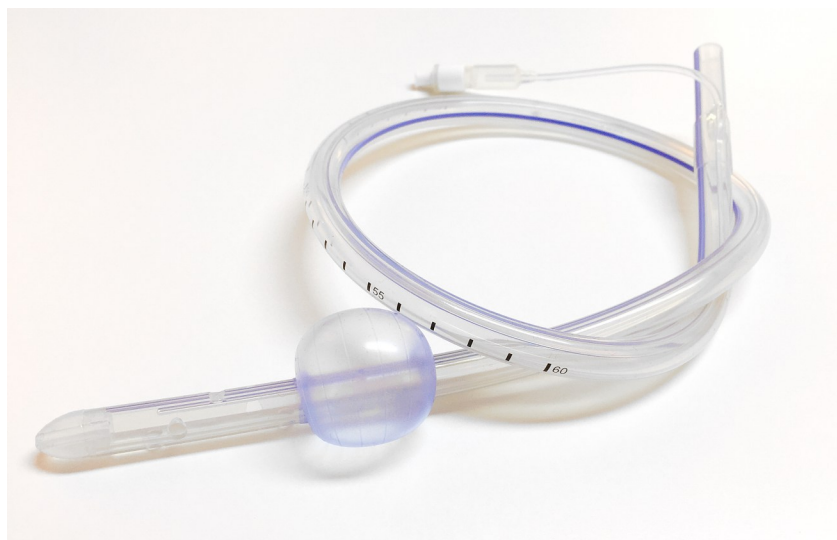

Revision date: 18.02.2025

The device is indicated for use in surgical procedures unique to the stomach. Introduced by mouth of the patient it allows, through its asymmetrical distal balloon, the movement of tissues, facilitating the surgeon involved in the intervention in laparoscopic or open surgery. The holes on the distal portion of atraumatic tip favor the complete suction.

Characteristics

- Material: medical grade silicone
- With radiopaque line
- With or without asymmetrical distal balloon
- Length 800 mm. or 1000mm
- Sterilised by gamma rays
- Latex and Phthalates free
- Double packed
